SPEC-934102

END STIRRUP

DESCRIPTION

Practical! A simple and lightweight solution for mounting traction hoists at the end of platforms.

Simple! The End Stirrup pivots under load to allow the hoist to remain inline with the suspension points if the platform is out of level. The “hats” allow the End Stirrup to be stabilized in an upright position when there is no tension or load on the hoist.

Strong! A tough steel construction with 1,500 lb load capacity.

SPECIFICATIONS

Part No.: 934102

Load Capacity: 1,500 lb

Dimensions: 38.81" x 30.12" x 2.25" (HxWxD)

Weight: 34 lb

Construction: Steel

Finish: Galvanized

1 2 3 4 5

A B C D

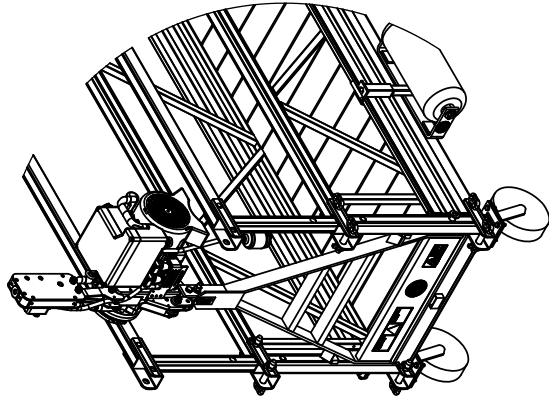

Step #1:

Rest the End Stirrup on the U-Frame tabs located on the inside of the U-Frame and insert the casters in the bottom of the U-Frame

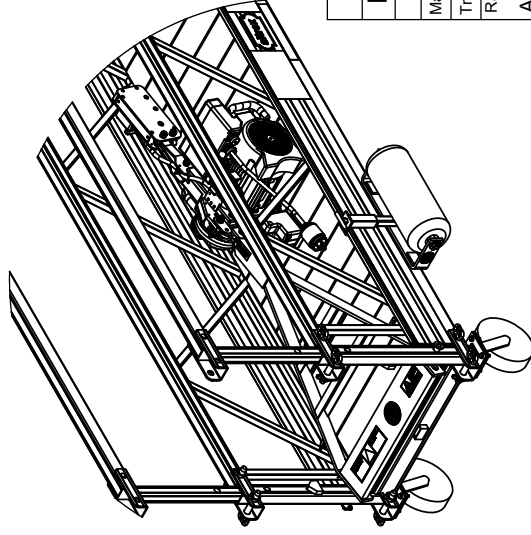

Step #2:

Slide the Stirrup Rod through the U-Frame, End Stirrup and casters, and lock into place via the lynch pin

Step #3:

When the End Stirrup is properly secured and resting on the U-Frame tabs, mount the traction hoist with the 1/2" hardware supplied

Step #4:

While transporting the platform, rest the End Stirrup and hoist on the platform deck as shown to prevent injury or death

1,500 lb Maximum Load Capacity
