SPEC-934102

END STIRRUP

DESCRIPTION

Practical! A simple and lightweight solution for mounting traction hoists at the end of platforms.

Simple! The End Stirrup pivots under load to allow the hoist to remain inline with the suspension points if the platform is out of level. The "hats" allow the End Stirrup to be stabilized in an upright position when there is no tension or load on the hoist.

Strong! A tough steel construction with 1,500 lb load capacity.

SPECIFICATIONS

Part No.: 934102

Load Capacity: 1,500 lb

Dimensions: 38.81" x 30.12" x 2.25" (HxWxD)

Weight: 34 lb

Construction: Steel

Finish: Galvanized
